Description

A Breakthrough in Anti-Aging! Featuring Apple Stem Cell Technology, Platinum Face by Fake Bake has combined our award winning self-tanning formula that contains premium DHA and Erythulose for longer lasting, natural looking results with the latest anti-aging ingredient - PhytoCellTec™ Malus Domestica - created from stem cells extracted from the rare Swiss apple Uttwiler Spatlauber. With age, the number of skin stem cells decreases and their ability to maintain and repair the skin diminishes. Plant cells are totipotent, meaning that every cell has the ability to regenerate new organs. It is this characteristic that has been harnessed within The Face by Fake Bake Platinum to ensure the longevity of your skin stem cells, essentially delaying biological aging of your essential cells.

- Long lasting self-tan
- Gentle formula suitable for sensitive facial skin
- Delays biological aging of essential cells
- Preserves youthful look & skin vitality
- Contains anti-aging peptides
- Combats the effects of oxidants
